Education, commerce, and international relations affect our English Learners and their educators. GATESOL's membership and conference attendees seek to learn the latest effective strategies to educate their students, train their faculty and staff, and engage members of their community. There are key stakeholders with similar concerns about their own communities. We want to recognize you, as one of those key stakeholders, and see how we can help you to meet the needs of your multilingual and multicultural clientele, customers, and constituents.
